

Turnkey Manufacturing Solutions, Inc.

worldwide RFIC test services

TMS AT-A-GLANCE

Turnkey Manufacturing Solutions, Inc. (TMS) is a multinational company specializing in providing RFIC test services to its customers. TMS provides cost effective RFIC test services with proven technical expertise and outstanding track record in volume production, consistent high yield, and on-time delivery.

Our fundamental advantage is our proven ability to provide easily accessible U.S.-based RFIC test engineering development and debug with a seamless link to our high volume, low cost test facilities in Taiwan. Dedicated to working closely with our customers from first tapeout, TMS not only provides turnkey outsourcing solutions for our customers, but also significantly shortens their design-to-market time.

TEST, ENGINEERING, AND PRODUCTION SERVICES

[San Diego - Engineering and Small-Volume Production Site](#)

The San Diego facility is its business and engineering center developing the company's RFIC test technology. It also has production test capability for pilot and small-volume production runs as well as for supporting local customers with small volume production needs.

[Taiwan - Corporate Headquarters and High-Volume Production Base](#)

High volume testing is performed in Northern Taiwan at our new 60,000 square foot facility in the Hsinchu Industrial Park. This new facility serves as our worldwide headquarters and volume test center. All customer specifications and requirements developed in San Diego are replicated and performed on a large volume scale at this facility.

WHAT MAKES TMS UNIQUE

TMS distinguishes itself from the RFIC test community by its outstanding record in volume RFIC testing know-how, consistent higher yields and on-time delivery. Due to its extensive RF expertise, TMS provides complete test yield analysis, real-time test debugging and on-the-spot corrective actions to guarantee consistent high test yields. TMS also provides complete turnkey backend services from foundry interface all the way to drop ship through global foundry and RFIC packaging alliances to help its IDM and fabless customers bring their RFIC products to the market faster, reliably and with significant cost savings.

In response to the growth of the wireless market, TMS' newly expanded Southern California and Taiwan operation brings the RFIC community extensive technical expertise as well as strong support to our customers.
